Toxicology 156 (2001) 183–185

TOXICOLOGY

Subject index of volume 156

Adjuvant; Allergy; IgE; Mice; Ovalbumin; Particles **156**, 149

Allergy; Adjuvant; IgE; Mice; Ovalbumin; Particles **156**, 149

Antibody response; TCDD; PCB; PFC; ELISA; Mouse; Immunotoxicity; Relative potency **156**, 1

Antioxidants; Methanol intoxication; Brain; *N*-acetylcysteine; Trolox derivative **156**, 47

Antioxidants; *para*-Aminophenol; Cultured kidney cells; Cytotoxicity; Oxidation **156**, 37

Apoptosis; Dimethylnitrosamine; Hepatic fibrosis; Cirrhosis; Liver collagen; Centrilobular necrosis; Bridging necrosis **156**, 129

Aroclor 1254^{R}; Brain regions; Calcium uptake; Development; Gender; Microsomes; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

***Bacillus intermedius* RNase (binase)**; Chicken embryo fibroblasts; Mouse fibroblasts; Transformation; Proliferation; Ca^{2+}-dependent K^{+} current **156**, 101

Benzophenone; Metabolites; Xeno-estrogen; Cytotoxicity; Rat hepatocytes; MCF-7 cells **156**, 27

Brain; Methanol intoxication; Antioxidants; *N*-acetylcysteine; Trolox derivative **156**, 47

Brain regions; Aroclor 1254^{R}; Calcium uptake; Development; Gender; Microsomes; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Bridging necrosis; Dimethylnitrosamine; Hepatic fibrosis; Cirrhosis; Liver collagen; Centrilobular necrosis; Apoptosis **156**, 129

Ca^{2+}-dependent K^{+} current; *Bacillus intermedius* RNase (binase); Chicken embryo fibroblasts; Mouse fibroblasts; Transformation; Proliferation **156**, 101

Cadmium; Cisplatin; Kidney; Lead; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Calcium uptake; Aroclor 1254^{R}; Brain regions; Development; Gender; Microsomes; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Cell culture; Copper ions; Dithiothreitol; Glutathione; Homocysteine; Hydrogen peroxide; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Centrilobular necrosis; Dimethylnitrosamine; Hepatic fibrosis; Cirrhosis; Liver collagen; Apoptosis; Bridging necrosis **156**, 129

Chemical carcinogen; Cytochrome P4501A1; Drug transporter; Multidrug resistance proteins; P-glycoprotein; Polycyclic aromatic hydrocarbon; Resistance **156**, 109

Chicken embryo fibroblasts; *Bacillus intermedius* RNase (binase); Mouse fibroblasts; Transformation; Proliferation; Ca^{2+}-dependent K^{+} current **156**, 101

Cirrhosis; Dimethylnitrosamine; Hepatic fibrosis; Liver collagen; Centrilobular necrosis; Apoptosis; Bridging necrosis **156**, 129

Cisplatin; Cadmium; Kidney; Lead; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Copper ions; Cell culture; Dithiothreitol; Glutathione; Homocysteine; Hydrogen peroxide; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Cultured kidney cells; *para*-Aminophenol; Cytotoxicity; Oxidation; Antioxidants **156**, 37

Cytochrome P4501A1; Chemical carcinogen; Drug transporter; Multidrug resistance proteins; P-glycoprotein; Polycyclic aromatic hydrocarbon; Resistance **156**, 109

Cytotoxicity; Benzophenone; Metabolites; Xeno-estrogen; Rat hepatocytes; MCF-7 cells **156**, 27

Cytotoxicity; *para*-Aminophenol; Cultured kidney cells; Oxidation; Antioxidants **156**, 37

PII: S0300-483X(00)00429-7

Developmental immunotoxicology; Lead; Differential risk; Windows of exposures **156**, 161

Development; Aroclor 1254^{R}; Brain regions; Calcium uptake; Gender; Microsomes; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Differential risk; Developmental immunotoxicology; Lead; Windows of exposures **156**, 161

Dimethylnitrosamine; Hepatic fibrosis; Cirrhosis; Liver collagen; Centrilobular necrosis; Apoptosis; Bridging necrosis **156**, 129

Dithiothreitol; Cell culture; Copper ions; Glutathione; Homocysteine; Hydrogen peroxide; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Drug transporter; Chemical carcinogen; Cytochrome P4501A1; Multidrug resistance proteins; P-glycoprotein; Polycyclic aromatic hydrocarbon; Resistance **156**, 109

ELISA; TCDD; PCB; PFC; Antibody response; Mouse; Immunotoxicity; Relative potency **156**, 1

Expression analysis; Multidrug resistance protein 1; Multidrug resistance protein 2; MDR1/P-glycoprotein **156**, 81

Gender; Aroclor 1254^{R}; Brain regions; Calcium uptake; Development; Microsomes; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Glutathione; Cell culture; Copper ions; Dithiothreitol; Homocysteine; Hydrogen peroxide; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Hepatic fibrosis; Dimethylnitrosamine; Cirrhosis; Liver collagen; Centrilobular necrosis; Apoptosis; Bridging necrosis **156**, 129

Histamine; IL-12; Histidine decarboxylase; Inflammation **156**, 57

Histidine decarboxylase; IL-12; Histamine; Inflammation **156**, 57

Homocysteine; Cell culture; Copper ions; Dithiothreitol; Glutathione; Hydrogen peroxide; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Hydrogen peroxide; Cell culture; Copper ions; Dithiothreitol; Glutathione; Homocysteine; Hydroquinone; Mercury ions; *N*-acetylcysteine **156**, 93

Hydroquinone; Cell culture; Copper ions; Dithiothreitol; Glutathione; Homocysteine; Hydrogen peroxide; Mercury ions; *N*-acetylcysteine **156**, 93

IgE; Adjuvant; Allergy; Mice; Ovalbumin; Particles **156**, 149

IL-12; Histidine decarboxylase; Histamine; Inflammation **156**, 57

Immunotoxicity; TCDD; PCB; PFC; ELISA; Antibody response; Mouse; Relative potency **156**, 1

Inflammation; IL-12; Histidine decarboxylase; Histamine **156**, 57

Inhalation; Methyl methacrylate; Olfactory; Nasal; Rat; Toxicity **156**, 119

Kidney; Cadmium; Cisplatin; Lead; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Lead; Cadmium; Cisplatin; Kidney; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Lead; Developmental immunotoxicology; Differential risk; Windows of exposures **156**, 161

Liver collagen; Dimethylnitrosamine; Hepatic fibrosis; Cirrhosis; Centrilobular necrosis; Apoptosis; Bridging necrosis **156**, 129

MCF-7 cells; Benzophenone; Metabolites; Xeno-estrogen; Cytotoxicity; Rat hepatocytes **156**, 27

MDR1/P-glycoprotein; Multidrug resistance protein 1; Multidrug resistance protein 2; Expression analysis **156**, 81

Mercury; Cadmium; Cisplatin; Kidney; Lead; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Mercury ions; Cell culture; Copper ions; Dithiothreitol; Glutathione; Homocysteine; Hydrogen peroxide; Hydroquinone; *N*-acetylcysteine **156**, 93

Metabolites; Benzophenone; Xeno-estrogen; Cytotoxicity; Rat hepatocytes; MCF-7 cells **156**, 27

Methanol intoxication; Brain; Antioxidants; *N*-acetylcysteine; Trolox derivative **156**, 47

Methyl methacrylate; Inhalation; Olfactory; Nasal; Rat; Toxicity **156**, 119

Mice; Adjuvant; Allergy; IgE; Ovalbumin; Particles **156**, 149

Microsomes; Aroclor 1254^{R}; Brain regions; Calcium uptake; Development; Gender; Mitochondria; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Mitochondria; Aroclor 1254^{R}; Brain regions; Calcium uptake; Development; Gender; Microsomes; Polychlorinated biphenyls; Neurotoxicity **156**, 13

Mouse fibroblasts; *Bacillus intermedius* RNase (binase); Chicken embryo fibroblasts; Transformation; Proliferation; Ca^{2+}-dependent K^+ current **156**, 101

Mouse; TCDD; PCB; PFC; ELISA; Antibody response; Immunotoxicity; Relative potency **156**, 1

Multidrug resistance protein 2; Multidrug resistance protein 1; MDR1/P-glycoprotein; Expression analysis **156**, 81

Multidrug resistance protein 1; Multidrug resistance protein 2; MDR1/P-glycoprotein; Expression analysis **156**, 81

Multidrug resistance proteins; Chemical carcinogen; Cytochrome P4501A1; Drug transporter; P-glycoprotein; Polycyclic aromatic hydrocarbon; Resistance **156**, 109

***N*-acetylcysteine**; Cell culture; Copper ions; Dithiothreitol; Glutathione; Homocysteine; Hydrogen peroxide; Hydroquinone; Mercury ions **156**, 93

***N*-acetylcysteine**; Methanol intoxication; Brain; Antioxidants; Trolox derivative **156**, 47

Nasal; Methyl methacrylate; Inhalation; Olfactory; Rat; Toxicity **156**, 119

Nephrotoxicity; Cadmium; Cisplatin; Kidney; Lead; Mercury; Plasma membrane; Proximal tubule; Rat; Transport **156**, 139

Neurotoxicity; Aroclor 1254^R; Brain regions; Calcium uptake; Development; Gender; Microsomes; Mitochondria; Polychlorinated biphenyls **156**, 13

Olfactory; Methyl methacrylate; Inhalation; Nasal; Rat; Toxicity **156**, 119

Ovalbumin; Adjuvant; Allergy; IgE; Mice; Particles **156**, 149

Oxidation; *para*-Aminophenol; Cultured kidney cells; Cytotoxicity; Antioxidants **156**, 37

***para*-Aminophenol**; Cultured kidney cells; Cytotoxicity; Oxidation; Antioxidants **156**, 37

Particles; Adjuvant; Allergy; IgE; Mice; Ovalbumin **156**, 149

PCB; TCDD; PFC; ELISA; Antibody response; Mouse; Immunotoxicity; Relative potency **156**, 1

PFC; TCDD; PCB; ELISA; Antibody response; Mouse; Immunotoxicity; Relative potency **156**, 1

P-glycoprotein; Chemical carcinogen; Cytochrome P4501A1; Drug transporter; Multidrug resistance proteins; Polycyclic aromatic hydrocarbon; Resistance **156**, 109

Plasma membrane; Cadmium; Cisplatin; Kidney; Lead; Mercury; Nephrotoxicity; Proximal tubule; Rat; Transport **156**, 139

Polychlorinated biphenyls; Aroclor 1254^R; Brain regions; Calcium uptake; Development; Gender; Microsomes; Mitochondria; Neurotoxicity **156**, 13

Polycyclic aromatic hydrocarbon; Chemical carcinogen; Cytochrome P4501A1; Drug transporter; Multidrug resistance proteins; P-glycoprotein; Resistance **156**, 109

Proliferation; *Bacillus intermedius* RNase (binase); Chicken embryo fibroblasts; Mouse fibroblasts; Transformation; Ca^{2+}-dependent K^+ current **156**, 101

Proximal tubule; Cadmium; Cisplatin; Kidney; Lead; Mercury; Nephrotoxicity; Plasma membrane; Rat; Transport **156**, 139

Rat; Cadmium; Cisplatin; Kidney; Lead; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Transport **156**, 139

Rat hepatocytes; Benzophenone; Metabolites; Xeno-estrogen; Cytotoxicity; MCF-7 cells **156**, 27

Rat; Methyl methacrylate; Inhalation; Olfactory; Nasal; Toxicity **156**, 119

Relative potency; TCDD; PCB; PFC; ELISA; Antibody response; Mouse; Immunotoxicity **156**, 1

Resistance; Chemical carcinogen; Cytochrome P4501A1; Drug transporter; Multidrug resistance proteins; P-glycoprotein; Polycyclic aromatic hydrocarbon **156**, 109

TCDD; PCB; PFC; ELISA; Antibody response; Mouse; Immunotoxicity; Relative potency **156**, 1

Toxicity; Methyl methacrylate; Inhalation; Olfactory; Nasal; Rat **156**, 119

Transformation; *Bacillus intermedius* RNase (binase); Chicken embryo fibroblasts; Mouse fibroblasts; Proliferation; Ca^{2+}-dependent K^+ current **156**, 101

Transport; Cadmium; Cisplatin; Kidney; Lead; Mercury; Nephrotoxicity; Plasma membrane; Proximal tubule; Rat **156**, 139

Trolox derivative; Methanol intoxication; Brain; Antioxidants; *N*-acetylcysteine **156**, 47

Windows of exposures; Developmental immunotoxicology; Lead; Differential risk **156**, 161

Xeno-estrogen; Benzophenone; Metabolites; Cytotoxicity; Rat hepatocytes; MCF-7 cells **156**, 27
